Please see the attached summary (Dimock resident key.doc) detailing the source data locations for the max results we have been talking about for these wells.

Thank you Ann for sending me the data files tonight- I owe you BIG.

An important issue to note - the max arsenic result for the Ex. 6 - Personal Privacy looks like it was from provided water. I think I remember Ann you and Bob telling me the provided water was local surface water?? This issue of the source/quality of the provided water need to be confirmed via your legal folks w/Cabot. I think this issue has raised its ugly head in past - residents are being provided essentially water that they assume to be of public water quality but there may be no assurances there depending on where it is coming from.

L

Lora Siegmann Werner, ATSDR/CDC Region 3
